Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 September 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 7-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaetsu et al.

Kaetsu (Figures 1-10c) shows an internal unit having a plurality of system units 14, 16 stacked one above the other with at least one printed circuit board 22 and fixing bars 12 fixed to coupling-bar fixing surfaces of the system units by screws wherein the coupling-bar fixing surfaces are at positions shifted from the circuit board. The unit 22 has optical module 24 connected to an optical fiber 34 and an electronic supply line connected to an electronic component 26 and power-supply circuit unit.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-6 and 9-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kaetsu et al.

Art Unit: 2839

Kaetsu shows all the features of these claims except the coupling-bar fixing surfaces to be inclined, trapezoidal shape control circuit units, covers or a cylindrical airtight body. The instant invention does not provide any reasons or specific problem to be solved by having inclined surfaces, trapezoidal shape and covers or a cylindrical body. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide inclined surfaces and trapezoidal shaped control-circuits depending upon the type and shape of the components contained within the units.

Furthermore, providing a cover(s) or an airtight cylindrical body is common knowledge. It would have been obvious to one having ordinary skill in the art at the time of the instant invention to provide covers or a cylindrical airtight body to protect the units and the fixing bars from the outside environment.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hwang, Sullivan et al. and Wood et al. are also pertinent to the instant invention.
